Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by either of Vitale or Brown, both of record. Both of Vitale and Brown have two winding regions of equal length separated by a post, member 3 of Vitale and member 3, 3a of Brown.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2, 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Black '405 in view of Hu, newly cited. Hu discloses a hand carried cord storage unit having tapered slots 131, 141 that also includes pairs of nubs on opposite walls thereof. It would have been obvious to one of ordinary skill in the art to provide the slots of Black '405 with pairs of nubs inside the slots in view of the teaching of Hu, in order to more firmly grip the line material. With respect to claim 2 whether the pairs of nubs are used to grip a single cord would obviously have

Art Unit: 3654

depended on how large the cord is, and one of ordinary skill in the art would have recognized that both pairs of nubs would grip a single cord if the cord was of a size to extend the length between successive pairs of nubs.

3. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Black '405 in view of Hu, as in the rejection of claim 1 above, further in view of Gruenewald. It would have been further obvious to one of ordinary skill in the art to make the slots of Black '405 flexible in view of the teaching of Gruenewald in order to facilitate placement of the cord within the slots.

4. Claims 5, 11 rejected under 35 U.S.C. 103(a) as being unpatentable over Black '405 in view of Hu, as in the rejection of claim 1 above, further in view of Vitale, of record. It would have been obvious to one of ordinary skill in the art to make the inner winding region length of both winding regions of the same length, especially in view of the showing of Vitale, note the length of the winding region between posts 2 and 3 is the same length as between posts 3 and 4. Such a modification would have been obvious since one of ordinary skill in the art would have discerned that the winding lengths could have been whatever length is desired depending on the amount of cord desired to be stored in each winding region.

5. Claims 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Black '405 in view of Hu and Vitale as in the rejection of claim 11 above, further in view of Gruenewald. It would further have been obvious to one of ordinary skill in the art to make the slots of Black '405 flexible in view of the teaching of Gruenewald in order to facilitate placement of the cord within the slots. The remarks above concerning claim 2 are equally applicable to claim 13.

Art Unit: 3654

Allowable Subject Matter

6. Claims 3-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 21-26 are allowed.
